TABLE OF CONTENTS FOR
"ELECTRIC MEASURING INSTRUMENTS"
BY V. O. ARUTYUNOV AND V. P. VALITSKIY

This book covers the basic features of electric measuring instruments and problems associated with their assembly and servicing. Brief instructions are given on making minor repairs.

Intended for electricians working with these instruments in industrial establishments, this book can also be used as a textbook in training technicians.

Numerous external views and cross-sectional sketches, as well as circuit diagrams, are included.

TABLE OF CONTENTS

I. Principle of Operation and Construction of Electric Measuring Instruments

1.	Introduction	7
2.	Torque and Restoring Torque	7
3.	Error and Correction	8
4.	Arrangement of the Moving Part	9
5.	Restoring Torque	11
6.	Damping	12
7.	External Shape of Measuring Instruments	15
8.	Requirements Peculiar to Measuring Instruments	18
9.	Magnetolectric Instruments	22
10.	Shunts and Series Resistors	26
11.	Magnetolectric Instruments with Converters	30
12.	Electrodynamic Instruments	34
13.	Electromagnetic Instruments	40
14.	Electrostatic Instruments	43
15.	Induction Instruments	46
16.	Induction Power Meters	51

50X1-HUM

17. Three-phase Wattmeters	56
18. Three-phase Induction Meters	61
19. Phase Meters	64
20. Frequency Meters	70
21. Recording Instruments	73
22. Measurement of Resistance	81
23. Single Bridge	84
24. Megger	88
25. Current Transformer	91
26. Voltage Transformer	100

II. Control and Testing of Electric Measuring Instruments

27. General Rules on Maintenance	104
28. Calibrating Measuring Instruments	105
29. Rules for Calibrating Ammeters and Voltmeters	109
30. Graduating Ammeters and Voltmeters	112
31. Calibrating Wattmeters by the Method of Direct Comparison with DC	113
32. Calibrating a Single-phase Wattmeter with AC by the Direct Comparison Method	116
33. Calibrating Three-phase Wattmeters	120
34. Graduating Three-phase Wattmeters with Two Rotating Elements	124
35. Circuits for Calibrating and Adjusting Meters	124
36. Transfer Ratio (revolutions/kw-h) and Constant of Meters	125
37. Actual Constant of Meter and Relative Correction Factor	126
38. Requirements Peculiar to Meters	127
39. Adjustment of Meters	129
40. Calibrating Meters after Adjustment	134
41. Adjusting Three-phase Active Power Meters	135
42. Testing Instrument Transformers	140
43. Determining the Error of a Current Transformer	142
44. Procedure in Calibrating a Current Transformer	143
45. Determining the Error of a Voltage Transformer	144
46. Procedure in Calibrating a Voltage Transformer	145

III. Mounting Electric Measuring Instruments

47. General Requirements for Installation of Measuring Instruments	147
48. Installation of Indicating Instruments	147
49. Arrangement and Installation of Meters	152
50. Connection of Meters of Various Types	154
51. Mounting Recording Instruments	155
52. Installation of Instrument Transformer	156
53. Connecting Instruments through Instrument Transformers	158
54. Rules for Detecting Incorrect Connection of Meters	164
55. Mounting Auxiliary Apparatus	169
56. Connecting Leads to Measuring Instruments	169
57. Maintenance of Measuring Instruments	170

IV. Repairing Electric Measuring Instruments

58. Inaccuracies in Measuring Instruments and Their Causes	172
59. Method of Detecting Inaccuracies	173
60. Organization of the Working Area and Apparatus Required	175

61. Safeguards in Dismantling Measuring Instruments	177
62. Eliminating Inaccuracies in Point Bearings and Supports	178
63. Eliminating Inaccuracies in the Indicating System	182
64. Eliminating Faults in the Springs and Connecting Leads	185
65. Balancing the Moving Part	189
66. Eliminating Sticking of the Moving Part	190
67. Repairing Breaks in the Electrical Circuit	193
68. Repairing Short Circuits	197
69. Repairing Intermittent Contacts in the Circuit	198
